

SERVE THE PEOPLE: SMASH CAPITALISM

create red power for communism

We are Serve the People

Serve the People (Tjen Folket) is a communist league working to create a revolutionary communist party in Norway. This party must be built with the revolutionary science of Marxism-Leninism-Maoism (MLM), applied on the conditions of the society where we work.

Serve the People wants to expose and combat the capitulationism, pessimism, pacifism and revisionism of the «old left» - in both the dogmatic and the right opportunist versions.

Serve the People develops work methods based on MLM for our work for advancing the revolutionary organization and the revolutionary fighting spirit of the working class and all oppressed people.

Serve the People recognize the revolutionary struggle in the third world, especially the people's wars for new democratic revolution (as in India and the Phillipines), as the most advanced forces of socialist revolution in the world.

Serve the People are convinced that the most important task - the main task - for communists is building the party and movement for revolution in our own countries. A strong, revolutionary and communist movement nationally is a precondition for strong proletarian internationalism.

Serve the People fight for Marxism-Leninism-Maoism (MLM) - against "left" dogmatism and right opportunism. We do not need phrase mongering and mechanical book knowledge. Neither do we need economist and narrow reform struggle.

We need to build dual power/peoples power/red power here and now. We want oppressed people to challenge oppression and grasp for power wherever

they can, in their school, university, work place, organization, street or town.

Serve the People fight for the total liberation of the working class and the full emancipation of the whole of mankind. For us, communism equals a real humane society.

We need dedicated activists

The people of all nations needs liberation, needs revolution. There is no other way to liberation than fierce struggle and hard work. We believe that communists of all countries need to find one own road ahead, but there is no other way than dedication and advanced theory and work methods.

We believe Marxism-Leninism-Maoism (MLM) is the most advanced theory for peoples and workers revolution. Marxism was inspired from british economy, german philosophy, and french socialism. Then enriched with experience from peoples struggle and power of Paris Commune, Russian revolution, Chinese Peoples War and Great Proletarian Cultural Revolution - and also other experiences from the class struggle of the last 150 years.

Political line is decisive, but political line is not enough. Only real work gives real results.

Join the struggle.
